

Team Error 418: I'm a Teapot presenting:

Le labyrinthe dans une cuisine (The labyrinth in a kitchen) *Temporary name*

Introduction:

Escape from the cats! And get fed on the way.

This is a single player AND multiplayer game. Each mode you will be a mouse and you will need to escape from two cats, who are trying to catch you because you are stealing their food. You will have three kinds of food to pick up on the way, as well as a weapon, which all of them allow you to power up to increase your chance of surviving.

Player:

The player is a mouse, who is hungry and searching for food. You decide to steal from your arch enemy, the cats.

Opponents:

Your opponents are your arch enemies, the cats. They will try to catch you; Not only because they can protect their food, they also get extra food. Yes, don't look away, their "extra food" is you.

Items:

There are four things in total you can pick up.

- 1) Food: This will get you fed, and also increase your score in the *Time Attack* mode. (See below).
- 2) Speed-up: This is also food as well. Although this will not increase your score, it will speed you up so that you can eat all possible food as fast as possible. You can decide when to use it.
- 3) Slow-down: This will affect the cats. The cats will slow-down when you use it. The effect is temporary, so use this limited time to do what you need to do.
- 4) Stun fork: The only weapon you can find and use in the game. As suggested in the name, this fork will stun the cat it hit for a while so that the cat is not able to move. You can choose when to use it. It needs to have a direct contact with a cat to have effect.

Single player mode:

This is the offline mode. You are the mouse and try escape from two AI-controlled cats. There are two sub-modes:

- 1) Casual manhunt mode: Escape from the cats and collect all food
- 2) Time Attack: Escape from the cats and collect as much food as possible

Multiplayer mode:

This is the online mode. You play with other players. There are two sub-modes:

- 1) Casual manhunt mode: this one is exactly the same as the offline version. One round is played, one of the players is a mouse, and the other two are the cats.
- 2) Multiplayer Time Attack: each of the players will get a chance to be the mouse and play a round of Time Attack. At the end, player with the highest score wins.
